Lesson 2: The Olmec and the Maya

Directions: Read the summary to reveal how the Olmec and the Maya developed complex civilizations in Mesoamerica. As you read, underline important details in each section that relate to that section’s title. Think about what you already know, what you want to know, and what you have learned after reading the summary.

A Mother Civilization (p. 169)
The Olmec civilization was Mesoamerica’s first great civilization. It lasted from about 1200 B.C. to about 300 B.C. The Olmec lived on the coast of the Gulf of Mexico. Most Olmec were farmers, but they also hunted and fished. They lived in small houses that surrounded small villages. The Olmec people were divided into social classes based on wealth and power. The Olmec government was a theocracy. Priests and government officials made up the most powerful social class. Merchants and craftspeople made up other social classes. Farmers made up the lowest. Olmec villages were connected by roads. The Olmec traveled these roads and traded with other Mesoamerican peoples. The Olmec civilization is often called “the Mother Civilization” of Mesoamerica. This is because the Olmec influenced all of the later Mesoamerican civilizations.

civilization was at its strongest about A.D. 250 and continued for another 650 years. The city-state Tikal was once home to nearly 100,000 Maya. More than 3,000 structures were built there. Today this ancient city has ruins of palaces, bath, pyramids, and aqueducts. Aqueducts carried running water. As sources of water, cenotes were holy to the Maya. Cenotes were sinkholes that collected water. Like the Olmec, the Maya developed a form of writing and lived in a theocracy. Also both Olmec and Mayan cities were set up to honor the gods.

Time and Numbers (p. 172)
The Maya used calendars to write down birth dates, marriages, dates to honor their gods, and other important information. The Maya actually had two different calendars. One was for the seasons. The other was for religious ceremonies. The Maya used a codex, or folding-screen book, to write down information forecasting the future. Codices also contained information about religious ceremonies. A codex was made of fig leaf bark or animal skin. The Maya were great mathematicians. They created their own counting system.

Olmec Accomplishments (p. 170)
The Olmec are most famous for the giant stone heads they made. The huge heads often represented Olmec rulers. The Olmec also made sculptures of their gods. The Olmec developed a number system, a calendar, and a form of writing. Later Mesoamerican civilizations would learn from the Olmec’s developments. No one knows why the Olmec civilization disappeared. Some people believe that the Olmec were the ancestors of the Maya.

Daily Life (p. 173)
Entire families lived together in Mayan culture. Men farmed and hunted. Women did housekeeping chores and made clothing. Houses were small and made of adobe, or dried mud-bricks. The Maya began to leave their cities about A.D. 900. Today some descendants of the Maya live in Mexico and Guatemala. But no one knows what happened to Mayan civilization.

The Maya (p. 170-171)
The Maya lived in more than 100 locations in Central America and Mexico. A large part of their civilization was on the Yucatán Peninsula, close to where the Olmec had lived. Mayan
Lesson 2: The Olmec and the Maya

The Olmec and Mayan civilizations were both similar and different.

Directions: In the blank beside each description, write an O if the phrase describes the Olmec, an M if it describes the Maya, or a B if it describes both the Olmec and the Maya. You will use your textbook and provide the page number where you found your answer.

Olmec (5) = O O O O O

Maya (5) = M M M M M

Both (4) = B B B B

p. 171 1. government was a theocracy  

p. 169 2. also called the “Mother Culture”  

p. 169 3. raised corn, beans, and squash  

p. 172 4. were skilled mathematicians  

p. 171 5. believed cenotes were a way to communicate with the gods  

p. 170/172 6. developed a calendar  

p. 170 7. constructed giant stone heads  

p. 170 8. built more than 3,000 structures in Tikal  

p. 169 9. lasted from about 1200 B.C. to about 300 B.C.  

p. 169 10. divided into social classes based on wealth and power  

p. 171 11. developed a system of writing  

p. 170 12. built observatories, palaces, plazas, baths, reservoirs, and aqueducts  

p. 173 13. may have disappeared as a result of invasion, crop failures, or civil war  

p. 170 14. may have migrated east
Lesson 2: The Olmec and the Maya

MULTIPLE CHOICE: Choose the letter of the choice that best completes the statement or answers the question.

1. Why are the Olmec called the "Mother Civilization" of Mesoamerica?
   A. The Olmec directly influenced all of the Mesoamerican civilizations that followed.
   B. The Olmec believed that mothers were the most important members of society.
   C. The Olmec had a form of government in which only mothers were allowed to rule.
   D. The Olmec held an annual meeting of Mesoamerican mothers to discuss children.

2. What are the Olmec most famous for?
   A. The Olmec are famous for their system of writing.
   B. The Olmec are famous for the calendars they created.
   C. The Olmec are famous for the jewelry they left behind.
   D. The Olmec are famous for the giant stone heads they made that represented rulers or gods.

3. Why do many archaeologists believe that the Olmec may have been ancestors of the Maya?
   A. The two civilizations existed at the same time.
   B. The two civilizations have many things in common.
   C. The two civilizations flourished in South America.
   D. The two civilizations continue to exist today.

4. Which was NOT a reason why the Maya used calendars?
   A. The Maya used calendars to know when to go to war.
   B. The Maya used calendars to record birth dates.
   C. The Maya used calendars to record marriage dates.
   D. The Maya used calendars to honor their gods on the right dates.

5. The Maya were great ________________.
   A. farmers
   B. basketball players
   C. mathematicians
   D. artisans
